## 2. Commodity & Currency Research Desk

- Rupee range bound in the weak but with volatile moves on back of strong selling & buying into capital market as all markets witnessed major volatile moves, rupee recover lost ground near 77.50. Dollar index yet holds firm near above \$102. And Crude around \$110 gives rupee little strength. Rupee yet keeps taking resistance on 20dma around 77.25 hence some gains can be witnessed towards 77.25 as rupee keeps testing 20dma resistance close above 77.25 will change the trend for rupee until then rupee broadly remains weak. Rupee can be seen in range of 77.25-77.75.
- Gold registered a positive movement from the levels of 49,600 to 50,800 showing some good amount of buying on to the (Bullion)'s market as equity market faced a lot of volatility gold and silver prices treated very much on the positive side as the dollar index traded on the negative side from \$105 to \$102.80 looking at the global market volatility it is much advisable to remain on the buying side on to the gold prices till the time the price are holding above 50,000 on weekly closing basis
