## 2. Commodity & Currency Research Desk

- Rupee trade mixed between band of 82.50-82.85 with mited trend in the week. As dollar index strength kept rupee away from rising and FII's buyijg figures in last few days kept rupee away from sellers. Along with FII's RBI selling was seen near 83.00 this keeping the fall in rupee limited before 83.00.
- Gold prices saw the week in weak territory as Comex Gold saw strong selling below 1850\$ towards 1820\$. In MCX Gold saw selling with prices touching below 55800 from highs of 57000 after inflation data coming higher than expected this hinting towards further hikes with hawkish tone from Fed as economy data as well were positive in US providing space for more cuts.
