Sensex, Nifty likely to make a cautious start

Indian equity benchmarks ended higher on Thursday, with Sensex and Nifty closing at fresh record highs, as strong corporate earnings results, falling oil prices and uninterrupted foreign and domestic fund inflows helped investors shrug off muted cues from global markets. Today, the markets are likely to make a cautious start, amid mixed global cues. Traders will be eyeing the macro data of industrial production for June scheduled to be announced post market hours. Investors will keep a close eye on unfolding weather in the country after data released by the India Meteorological Department (IMD) showed that 39 percent of the 681 districts in India have received less than normal rainfall in the week ended August 8. However, traders will be getting some encouragement later in the day, with the Lok Sabha passing four bills to amend the GST law, as Finance Minister Piyush Goyal said lower tax rates will improve compliance and enhance revenue collection. He said tax collection will not come down despite reduction in taxes as he allayed the concerns to that effect raised by some members and added that the lower rates will rather improve compliance and enhance revenue collection. Meanwhile, the Securities and Exchange Board of India (SEBI) in its annual report for 2017-18 has said that it is planning to put in place measures to curb insider trading and misuse of unpublished price-sensitive information through timely announcements by listed companies.

Domestic Market Overview

Benchmarks end at fresh record closing highs; Sensex tops 38K level

Indian equity benchmarks extended previous session's rally to end the Thursday's trade at fresh record closing high levels, with Sensex and Nifty conquering their crucial 38,000 and 11,450 marks, respectively. After making a positive start markets traded in green throughout the day, as sentiments remained up-beat with the International Monetary Fund's (IMF) statement that India is on track to hold its position as one of the world's fastest-growing economies as reforms start to pay off. The \$2.6 trillion economy was described by Raul Salgado, the IMF's mission chief for India, as an elephant starting to run, with growth forecast at 7.3% in the fiscal year through March 2019 and 7.5% in the year after that. Adding some optimism among the investors, Commerce and Industry Minister Suresh Prabhu said that the exports are showing good sign and registering increase at the rate of 20%. Meanwhile, the government will shortly unveil a new industrial policy that aims to speed up regulatory reforms and lower power tariffs to make businesses more competitive and create more jobs.

Markets witnessed some hiccups in noon deals but managed to end comfortably above their crucial levels, as traders took some encouragement with a private report stating that optimism level among India's chief financial officers for the July-September period has improved as compared to the previous quarter and going forward distribution of rainfall, raw material costs and revival in demand will be the key deciding factors. Sentiments remained buoyed with report that India's average per capita income in the last four financial years was higher at Rs 79,882 as compared to the preceding four fiscals. As per the report, the per capita income grew by 4.6% in 2013-14 to Rs 68,572; 6.2% to Rs 72,805 in 2014-15; 6.9% to Rs 77,826 in 2015-16 and by 5.7% to Rs 82,229 in 2016-17.

power stocks ended higher on report that the installed power generation capacity in India has risen to 344 GigaWatts (GW) and its energy deficit, which stood at over 4% in 2014, has shrunk to less than 1% in 2018. Besides, real estate sector remained on buyers' radar with private report stating that Indian real estate sector is seeing an encouraging growth across assets class with returning confidence in the market. While, corporate occupiers and institutions investors are seen actively investing and leasing office space in the country.

Global Market Overview

Asian markets end mixed on Thursday

Asian equity markets ended mixed on Thursday after China announced retaliatory tariffs against the United States, raising concerns over the escalation of the trade war between the world's top two economies. A slump in oil prices overnight and the US announcement that it would soon impose new sanctions on Russia also kept investors nervous. Chinese shares ended higher after a government report showed consumer inflation in the country rose an annual 2.1 percent in July, exceeding expectations for 2.0 percent and up from 1.9 percent in June. The producer price index climbed 4.6 percent from last year - beating forecasts for 4.5 percent and down from 4.7 percent in the previous month. Meanwhile, Japanese shares ended lower as machinery orders data disappointed and caution crept in ahead of US-Japan trade talks. Singapore's market was closed for a holiday.

US markets end mostly lower on Thursday

The US markets ended mostly lower on Thursday, but the Nasdaq bucked the trend to rise for an eighth straight session, logging its best winning streak since October. Trade tensions between Washington and Beijing linger, threatening to derail the market's upside momentum. China warned that duties imposed by President Donald Trump's administration on some \$50 billion of Chinese imports set to be enacted on August 23 would be matched, and China's Ministry of Commerce said that the country has to retaliate as necessary. On the economic front, the Labor Department released a report showing first-time claims for unemployment benefits unexpectedly edged lower in the week ended August 4. The report said initial jobless claims dipped to 213,000, a decrease of 6,000 from the previous week's revised level of 219,000. Street had expected jobless claims to inch up to 220,000 from the 218,000 originally reported for the previous week.

➤ **Indian exporters need to diversify export basket: Suresh Prabhu**

In order to expand overseas shipments, Commerce and Industry Minister Suresh Prabhu has said that Indian exporters need to diversify export basket and explore markets such as Africa and Latin America. He also expressed need to look on ways to promote services exports.

Prabhu mentioned about the efforts being taken by the government to boost the country's exports and to further increase the ease of doing business. He said that a comprehensive strategy is being worked out and a policy to promote agriculture exports has also been prepared by the ministry which would soon seek the Cabinet's approval on that.

Besides, Commerce and Industry Minister highlighted that the exports are showing good sign and registering increase at the rate of 20%. Moreover, he praised recently developed mobile app by the Federation of Indian Export Organisations (FIEO) for exporters, noting that the app will provide big opportunity to everybody and help promote export interests in the country.

➤ **DoT amends telecom licences to incorporate net neutrality rules**

The Department of Telecommunications (DoT) has amended the licences of telecom operators and internet service providers to incorporate net neutrality rules in the country, which bar service providers from discriminating against internet content and services by blocking, throttling or granting them higher speed access. In a notification, DoT said that the government is committed to the fundamental principles and concepts of net neutrality.

Therefore, internet access services need to be governed by a principle that restricts any form of discrimination, restriction or interference in the treatment of content, including practices like blocking, degrading, slowing down or granting preferential speeds of treatment to any content. The telecom department has mentioned to keep critical internet of things services, which shall be identified by DoT, to be excluded from the restrictions of net neutrality. The amendments are to be issued by division managing particular licences.

The new amendment states that a telecom licence holder providing internet access service shall not engage in any discriminatory treatment of content, including based on sender or receiver, the protocols being used in or the user equipment. The amendment prohibits from entering into any arrangement, agreement or contract by whatever name called, with any person, natural or legal that has the effect of discriminatory treatment of content. According to the note, the amendments will include specific points around principle of non-discriminatory treatment, definition of specialised services and reasonable traffic management and other exceptions.

➤ **RBI to transfer Rs 50,000 crore as dividend to government**

In line with the Union Budget provisions, the Central Board of Directors of the Reserve Bank of India (RBI) approved the transfer of Rs 50,000 crore as dividend to the government for the financial year ending June 30, 2018, helping the Centre stick to its fiscal roadmap. The RBI, which follows July-June financial year, has paid about 63 percent higher dividend than last year (2016-17). It is to be noted that the RBI transferred a surplus of Rs 30,659 crore as dividend to the government for the year ended June 30, 2017, which was less than half of what it paid in the previous year (Rs 65,876 crore).

In March, the RBI paid interim dividend of Rs 10,000 crore to support the government's fiscal position. In the Union Budget for 2018-19, the government projected to collect Rs 54,817.25 crore as dividend or Surplus of RBI, Nationalised Banks and Financial Institutions. The government realised Rs 51,623.24 crore under this head in the previous fiscal.

The fall in the surplus payout in June 2017 was because of expenses incurred on printing of new currency notes following the demonetisation of Rs 500 and Rs 1,000 on November 9, 2016. Under the RBI Act, 1934, the central bank is required to pay the government its surplus after making provisions for bad and doubtful debts, depreciation in assets and, contribution to staff and superannuation fund among others.

➤ **Govt needs to look into problems faced by exporters trading with Iran: FIEO**

Indicating need to solve problems being faced by exporters shipping consignments to Iran, Federation of Indian Export Organisations (FIEO) President Ganesh Gupta has said the government needs to look into these problems, in view of the increasing threat of US economic sanctions against the Persian Gulf nation.

Besides, FIEO Director General Ajay Sahai has stated that the government has to take a call on the issue as the existing rupee account for export purposes have funds for another 3-4 months only. He added that 'there is an uncertainty with Iran on trade front'.

The US has told India and other countries to cut oil imports from the Gulf nation to 'zero' by November 4 or face sanctions. Iran is India's third-largest oil supplier after Iraq and Saudi Arabia. Iran supplied 18.4 million tonnes of crude oil between April 2017 and January 2018 (first 10 months of fiscal 2017-18). Bilateral trade between India and Iran increased to \$13.8 billion in financial year 2018 from \$12.9 billion in the previous fiscal. However, India's exports goods worth only \$2.5 billion to that country.
